

6-Month Backend Fast-Track Roadmap

MONTH 1: Backend & SQL Depth

- Execution plans & indexing
- Improve testing & logging

MONTH 2: Docker + Compose

- Containerize project
- Simulate failures

MONTH 3: CI/CD

- Full pipeline (build, test, docker push)

MONTH 4–5: AWS Core

- EC2 + RDS deployment
- IAM + Security groups
- Basic monitoring

MONTH 6: Kafka Essentials

- Producer/consumer deep understanding
- Retry & DLQ
- Build small event-driven demo

FAST-TRACK RULE:

- Weekly rebuild from memory
- Deploy full system by end of Month 6
